

ch10-3 数据存储

使用json.dump() 和json.load()

json.dump():内存=>文件

```
import json

numbers = [2,3,5,7,11,13]

filename = 'numbers.json'
with open(filename,'w') as file_object:
    json.dump(numbers,file_object)
```

json.load():文件=>内存

```
import json

filename = 'numbers.json'
with open(filename) as file_object:
    numbers = json.load(file_object)

print(numbers)
```
